DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 10 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 10 is drawn to a "program" per se as recited in the preamble and as such is nonstatutory subject matter. See MPEP § 2106.IV.B.1.a. Data structures not claimed as embodied in computer readable media are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer. See, e.g., Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention, which permit the data structure's functionality to be realized. In contrast, a claimed computer readable medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory. Similarly, computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any

Art Unit: 2621

structural and functional interrelationships between the computer program and other claimed elements of a computer, which permit the computer program's functionality to be realized.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al. (US 5.589.947).

Regarding Claim 7: Sato et al. discloses a control apparatus characterized by comprising: detection means for detecting a first information processing apparatus capable of communicating directly through wireless communication (column 1 lines 41-45); request means for requesting, to said first information processing apparatus detected by detection means, address information on a network of a second information processing apparatus connected to said first information processing apparatus via said network (column 1 lines 28-40); acquisition means for acquiring first operation screen information for displaying a first operation screen to be operated when controlling said first information processing apparatus and second operation screen information for displaying a second operation screen to be operated when controlling said second information processing apparatus (column 1 lines 41-53); display means for displaying first operation screen and second operation screen based on first operation screen

Application/Control Number: 10/509,480 Page 4

Art Unit: 2621

information and second operation screen information acquired by said acquisition means (column 1 lines 41-53); and control means, if an input is provided from second operation screen displayed by said display means, for controlling indirectly said second information processing apparatus via said first information processing apparatus based on said address information transmitted from said first information processing apparatus in response to a request generated by said request means (column 1 line 54 to column 2 line 7).

Regarding Claims 8-11: Claims 8-11 are rejected for the same subject matter as claim 1.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL TEKLE whose telephone number is (571)270-1117. The examiner can normally be reached on 7:30am to 5:00pm M-R and 7:30-4:00 Every other Friday..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha D. Banks-Harold can be reached on 571-272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
